FINANCIAL PERFORMANCE FOR THE YEAR ENDED 30 JUNE 2009

Statement of the Municipal Manager on Financial Statements

As the Municipal Manager I am responsible for guiding the preparation, integrity and fair presentation of the annual financial statements of Breede River Wineland's Municipality. The annual financial statements have been independently audited by the Auditor General who was given unrestricted access to all financial records and related data, including minutes of meetings relevant to the auditing of financial statements.

The annual financial statements for the year ended 30 June 2009 have been prepared in accordance with Section 126(1) of the Municipal Finance Management Act (Act 56 of 2003). They are based on (GRAP), General Recognised Accounting Practice accounting standards which have been consistently applied, and which are supported by reasonable and prudent judgements and estimates. I have no reason to believe that the Municipality will not be a going concern in the foreseeable future based on forecasts and available cash resources.

I have implemented stringent internal controls, which are designed to provide reasonable, but not absolute, assurance as to the reliability of the annual financial statements and to adequately safeguard, verify and maintain accountability of assets. These controls are monitored throughout the Municipality by management and employees. Processes are in place to monitor internal controls, to identify material breakdowns and implement timely corrective action.

Mr SA Mokweni Municipal Manager

Breede River Winelands Municipality

Other information

Nature of Business

Breede River Winelands Municipality is a local municipality performing the functions as set out in the Constitution. (Act no 105 of 1996).

Country of Origin and Legal Form

South African local municipality as defined by the Municipal Structures Act (Act no 117 of 1998)

ACCOUNTING POLICY - 30 IUNE 2009

Summary of significant accounting policies for the year ended 30 June 2009 1.

The principal accounting policies applied in the preparation of these financial statements are set out below and are consistent with those applied in the previous year unless otherwise stated.

1. STATEMENT OF COMPLIANCE

The financial statements comply with General Recognised Accounting Standards (GRAP) adopted by the Accounting Standards Board (ASB).

1.1. Basis of preparation

GRAP 4

GRAP 102

The financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practices (GRAP) prescribed by the Minister of Finance. The Municipality adopted the following new standards in the current year, as approved by the Minister of Finance on 9 May 2008 per Government Gazette 31021:

GRAP 5	Borrowing Costs
GRAP 6	Consolidated and Separate Financial Statements
GRAP 7	Investments in Associates
GRAP 8	Interests in Joint Ventures
GRAP 9	Revenue
GRAP 10	Hyperinflationary Economies
GRAP 11	Construction Contracts
GRAP 12	Inventories
GRAP 13	Leases
GRAP 14	Events after the reporting date
GRAP 16	Investment Property
GRAP 17	Property, Plant and Equipment
GRAP 19	Provisions, Contingent Liabilities and Contingent Assets
GRAP 100	Non-current assets held for sale and discontinued operations
GRAP 101	Agriculture

Intangible assets

Effects of Changes in Foreign Exchange Rates

Accounting Policies for material transactions, events or conditions not covered by the above GRAP Standards have been developed in accordance with paragraphs 7, 11 and 12 of GRAP 3. These Accounting Policies and the applicable disclosures have been based on International Public Sector Accounting Standards (IPSAS) and the South African Statements of Generally Accepted Accounting Practices (SA GAAP), including any interpretations of such Statements issued by the Accounting Practices Board.

The preparation of financial statements in conformity with GRAP requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS that have significant effect on the financial statements and estimates with a significant risk of material adjustment in the next year are discussed in note 41.

GRAP 16 – Investment Property

Investment property is defined as property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Investment property is measured at cost and is depreciated on a straight-line basis over its useful life.

The application of the standard resulted in a reclassification of amounts previously recognised as property, plant and equipment. Similarly rental revenue from investment property is also reflected separately from equipment rental.

22 GRAP 17 - Property, plant and equipment

GRAP 17 clarifies that an entity should consider an item of property, plant and equipment as a combination of various components with separate useful lives or consumption patterns. These separate components are used to calculate depreciation, test for derecognition and for the treatment of expenditure to replace or renew a component of that item of property, plant and equipment. It further confirms that the cost of an item of property, plant and equipment should include not only the initial estimate of the costs relating to dismantlement, removal or restoration of the property at the time of installing the item, but also during the period of use for purposes other than producing inventory. The residual value, useful life and depreciation method of an asset must be reviewed annually. Residual value should not include expected future inflation. There is no cessation of depreciation when assets are idle.

ACCOUNTING POLICY - 30 IUNE 2009

The application of the new standard had a limited impact on the results of the current year as the components approach in respect of infrastructure assets will only be applied in future years as allowed per the transitional provisions specified in Directive 4.

2.3 Standards not yet effective

The following Standards have been issued, but are not yet effective:

GRAP No	Description	Effective date	Anticipated impact on financial statements
18	Segment Reporting	Unknown	Disclosure only
21	Impairment of non-cash generating assets	Unknown	No material impact.
			Requirements of GRAP 21 are similar to the requirements of IAS 36 (Impairment of assets) and IPSA 21 (Impairment of non-cash generating assets), applied by the municipality during the 2008/09 financial year.
23	Revenue from non-exchange transactions	Unknown	Disclosure only
24	Presentation of Budget Information in Financial Statements	Unknown	Disclosure only
26	Impairment of cash generating assets	Unknown	No impact.
			Requirements of GRAP 26 are similar to the requirements of IAS 36 (Impairment of assets) applied by the municipality during the 2008/09 financial year.

A summary of the significant accounting policies, which have been consistently applied except where an exemption has been granted, are disclosed below.

Presentation currency

These annual financial statements are presented in South African Rand.

1.3. Going concern assumption

These annual financial statements are prepared on the basis that the municipality will remain a going concern for the foreseeable future.

1.4. Segmental reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and return that are different from those of segments operating in other economic environments.

1.5. Foreign currency transactions

The Municipality will not incur a foreign currency liability other than that allowed by the MFMA.

Housing Development Fund 1.6.

The Housing Development Fund was established in terms of Section 15(5) and 16 of the Housing Act, (Act 107 of 1997), which came into operation on 1 April 1998, requires that the municipality maintain a separate housing operating account. Loans form National and Provincial Government used to finance housing developments undertaken by the Municipality were extinguisehed on 1 April 1998 and transferred to the Housing Development Fund.

The Housing Act also requires in terms of Section 14(4)(d)(ii)(aa) read with, inter alia, Section 16(2) that the net proceeds of any rental, sale of property or alienation, financed previously from government housing funds, be paid into a separate operating account and be utilised by the Municipality for housing development subject to the approval of the Provincial MEC responsible for housing.

The following provisions are set for the creation and utilisation of the Housing Fund:

- 1.6.1. The proceeds in this fund are utilised for housing developments in accordance with the National Housing Policy and also for housing development projects approved by the MEC.
- Any contributions to or from the fund are shown as transfers in the Statement of Changes in Net Assets.
- Interest earned on the investments backing up this fund is recorded as part of interest earned in the Statement of Financial Performance and is then transferred via the Statement of Changes in Net Assets to the Housing Development Fund.
- 1.6.4. Any surplus / (deficit) on the Housing Statement of Financial Performance must be transferred to the Housing Development Fund.

ACCOUNTING POLICY - 30 IUNE 2009

1.7. Reserves

1.7.1. Capital Replacement Reserve (CRR)

In order to finance the future provision of infrastructure and other items of property, plant and equipment from internal sources amounts are transferred out of the accumulated surplus/(deficit) into the Capital Replacement Reserve (CRR) in terms of a Council resolution. The cash allocated to the CRR can only be utilised to finance items of property, plant and equipment. The following provisions are set for the creation and utilisation of the CRR:

- 1.7.1.1. The cash which backs up the CRR is invested until it is utilised. The cash may only be invested in accordance with the investment policy of the municipality.
- 1.7.1.2. Interest earned on the CRR investment is recorded as part of total interest earned in the Statement of Financial Performance. The total interest earned on all the CRR investments of the municipality is transferred to the CRR.
- 1.7.1.3. The CRR may only be utilised for the purpose of purchasing items of property, plant and equipment for the municipality and may not be used for the maintenance of these items.
- 1.7.1.4. The proceeds from the disposal of property, plant and equipment must be transferred to the CRR.
- 1.7.1.5. The CRR is reduced and the accumulated surplus/ (deficit) credited with corresponding amounts when the funds are utilised.
- 1.7.1.6. The amounts transferred to the CRR are based on the Municipality's need to finance future capital projects.
- 1.7.1.7. The Council determines the annual contribution to the CRR.

1.7.2. Capitalisation Reserve

On the implementation of GAMAP/GRAP, the balance on certain funds, created in terms of the various Provincial Ordinances applicable at the time, that had historically been utilised for the acquisition of items of property, plant and equipment have been transferred to a Capitalisation Reserve instead of the accumulated surplus/(deficit) in terms of a directive (budget circular) issued by National Treasury.

The balance on the Capitalisation Reserve equals the carrying value of the items of property, plant and equipment financed from the former legislated funds. When items of property, plant and equipment are depreciated, a transfer is made from the Capitalisation Reserve to the accumulated surplus/ (deficit). When an item of property, plant and equipment is disposed, the balance in the Capitalisation Reserve relating to such item is transferred to the accumulated surplus/(deficit).

1.7.3. Government Grant Reserve

When items of property, plant and equipment are financed from government grants, a transfer is made from the accumulated surplus/ (deficit) to the Government Grants Reserve equal to the Government Grant recorded as revenue in the Statement of Financial Performance in accordance with a directive (budget circular) issued by National Treasury. When such items of property, plant and equipment are depreciated, a transfer is made from the Government Grant Reserve to the accumulated surplus/ (deficit). The purpose of this policy is to promote community equity and facilitate budgetary control by ensuring that sufficient funds are set aside to offset the depreciation charges that will be incurred over the estimated useful life of the item of property, plant and equipment financed from Government Grants.

When an item of property, plant and equipment financed from government grants is disposed, the balance in the Government Grant Reserve relating to such item is transferred to the accumulated surplus/(deficit).

1.7.4. Public Contributions and Donations Reserve

When items of property, plant and equipment are financed from public contributions and donations, a transfer is made from the accumulated surplus/(deficit) to the Public Contributions and Donations Reserve equal to the Public Contributions and Donations Reserve recorded as revenue in the Statement of Financial Performance in accordance with a directive (budget circular) issued by National Treasury. When such items of property, plant and equipment are depreciated, a transfer is made from the Public Contributions and Donations Reserve to the accumulated surplus/ (deficit). The purpose of this policy is to promote community equity and facilitate budgetary control by ensuring that sufficient funds are set aside to offset the depreciation charges that will be incurred over the estimated useful life of the item of property, plant and equipment financed from Public Contributions and Donations.

When an item of property, plant and equipment financed from Public Contributions is disposed, the balance in the Public Contributions and Donations Reserve relating to such item is transferred to the accumulated surplus/ (deficit).

1.7.5. Revaluation Reserve

The surplus arising from the revaluation of land and buildings is credited to a non-distributable reserve. Land and buildings are revalued every four years. The revaluation surplus is realised as revalued buildings are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/ (deficit). On disposal the net revaluation surplus is transferred to the accumulated surplus/ (deficit) while gains or losses on disposal, based on current values, are credited or charged to the Statement of Financial Performance.

1.8. Leases

1.8.1. Lessee Accounting

Amounts held under finance leases are initially recognised as assets of the Municipality at their fair value at the inception of the lease or, if lower at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly to profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Municipality's policy on borrowing costs.

ACCOUNTING POLICY - 30 IUNE 2009

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

The Municipality will not incur a foreign currency lease liability other than that allowed by the MFMA.

1.8.2. Lessor Accounting

Amounts due from lessees under finance leases are recorded as receivables at the amount of the Municipality's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return to the Municipality's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

1.9. Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for the intended use or sale, added to the costs of these assets, until such time as the assets are substantially ready for their intended use of sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in the statement of financial performance in the period in which they are incurred.

1.10. Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the Statement of Financial Performance over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Municipality has the unconditional right to defer settlement of the liability for at least 12 months after the date of the Statement of Financial Position.

1.11. Provisions

A provision is recognised when the municipality has a present obligation (legal or constructive) as a result of a past event and it is probable (i.e. more likely than not) that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The municipality has discounted provisions to their present value when the effect of the time value of money is material. The notional interest charge representing the unwinding of the provision discounting is included in the Statement of Financial Position.

Provisions are reviewed at each Statement of Financial Position date and adjusted to reflect the current best estimate.

1.12. Employee Benefits

1.12.1. Pension obligations

The Municipality operate various pension schemes. The schemes are generally funded through payments to insurance companies or trusteeadministered funds, determined by periodic actuarial calculations. The Municipality has both defined benefit and defined contribution plans. A defined contribution plan is a pension plan under which the Municipality pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

A defined benefit plan is a pension plan that is not a defined contribution plan. Typically, defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the Statement of Financial Performance in the accounting period in which it occurs.

Past-service costs are recognised immediately in income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

ACCOUNTING POLICY - 30 IUNE 2009

For defined contribution plans, the Municipality pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

1.12.2. Post Retirement Medical obligations

The Municipality provides post-retirement healthcare benefits to its retirees. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment using the same accounting methodology as used for defined benefit pension plans.

Actuarial gains and losses arising from experience adjustments, and changes in actuarial assumptions are charged or credited to the Statement of Financial Performance. These obligations are valued annually by independent qualified actuaries

1.12.3. Long Service awards

Long service awards are provided to employees who achieve certain pre-determined milestones of service within the municipality. The municipality's obligation under these plans is valued by independent qualified actuaries at year-end and the corresponding liability is raised.

Payments are set-off against the liability, including notional interest, resulting from the valuation by the actuaries are charged against the Statement of Financial Performance as employee benefits upon valuation.

1.13. Financial Instruments

Financial instruments carried in the Statement of Financial Position include cash and cash equivalents, investments, accounts receivable, accounts payable and borrowings. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

Financial assets are derecognized when the contractual rights to the cash flows from the financial assets expire or have been transferred and the Municipality has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when it is extinguished, i.e. when the contractual right is discharged, cancelled or expires.

The municipality has various types of financial instruments and these can be broadly categorised as either Financial Assets or Financial Liabilities.

Financial Assets

A financial asset is any asset that is a cash equivalent or contractual right to receive cash. The municipality has the following types of financial assets as reflected in the Statement of Financial Position or in the notes thereto:

- Unlisted Investments
- Investment in Fixed Deposits
- Long-term Receivables
- Consumer Debtors
- Other Debtors
- Short term Investment Deposits
- Bank Balances and Cash
- Operating lease assets

The Financial Assets of the municipality are presently classified as follows into three categories:

The I maneral 7 issets of the mumerpancy are presently classified as follows into three categories.		
Type of Financial Asset	Classification in terms of IAS 39.09	
Listed Investments	Held at fair value through profit or loss	
Unlisted Investments	Held at fair value through profit or loss	
Investments in Fixed Deposits	Held to maturity	
Long-term Receivables	Loans and receivables	
Consumer Debtors	Loans and receivables	
Other Debtors	Loans and receivables	
Short-term Investment Deposits	Held to maturity	
Bank Balances and Cash	Held to maturity	

Financial Liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity. The municipality has the following types of financial liabilities as reflected in the Statement of Financial Position or in the notes thereto:

- Long-term Liabilities
- Provisions
- Creditors
- Bank Overdraft
- Current Portion of Long-term Liabilities
- Consumer Deposits
- VAT
- Operating lease liabilities

ACCOUNTING POLICY - 30 IUNE 2009

There are two main categories of Financial Liabilities, based on how they are measured. Financial liabilities may be measured at:

- Fair value through profit or loss; or
- Not at fair value through profit or loss ("other financial liabilities"). (ii)

Trade Payables

Trade payables and other receivables are originally carried at fair value and subsequently are measured at amortised cost using the effective interest

Liability for annual leave is recognised as it accrues to employees. Provision is based on the total accrued leave days at year-end.

Unutilised Conditional Grants

Unutilised conditional grants are reflected on the Statement of Financial Position as a creditor - Unutilised conditional grants. They represent unspent government grants, subsidies and contributions from the public. This creditor always has to be backed by cash. The following provisions are set for the creation and utilisation of this creditor:

- The cash which backs up the creditor is invested until it is utilised.
- Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor. If it is the Municipality's interest it is recognised as interest earned in the Statement of Financial Performance.
- Whenever an asset is purchased out of the unutilised conditional grant an amount equal to the cost price of the asset purchased is transferred from the Unutilised Conditional Grant into the statement of financial performance as revenue. Thereafter an equal amount is transferred on the Statement of changes in net assets to a Government Grant Reserve. This reserve is equal to the remaining depreciable value (book value) of assets purchased out of the Unutilised Conditional Grants. The Government Grant Reserve is used to offset depreciation charged on assets purchased out of the Unutilised Conditional Grants.

Measurement

Financial Assets:

Held-to-maturity investments and loans and receivables are initially measured at fair value, and subsequently measured at amortised cost. Financial assets are measured at fair value with the profit or loss being recognised in the Statement of Financial Performance.

Financial Liabilities:

Financial liabilities are measured at amortised cost using the effective interest rate method where applicable.

The requirement that financial assets and liabilities (previously instruments) should initially be measured at fair value has been exempted in terms of General notice 552 of 2007.

Impairment of Financial Assets:

Annually an assessment is made as to whether there is any impairment of Financial Assets. If so, the recoverable amount is estimated and an impairment loss is recognised.

Consumer Debtors are stated at cost less a provision for bad debts. The provision is made by assessing the recoverability of consumer debtors collectively after grouping the debtors in financial asset groups with similar credit risk characteristics.

Loans and Receivables are non-derivative Financial Assets with fixed or determinable payments. They are included in current assets, except for maturities greater than 12 months, which are classified as non-current assets. Loans and receivables are recognised initially at cost which represents fair value. After initial recognition financial assets are measured at amortised cost, using the effective interest rate method less a provision for impairment. All classes of loans and receivables are separately assessed for impairment annually.

1.14. Value Added Tax

The Council accounts for Value Added Tax on the cash basis.

1.15. Property Plant and Equipment

Land and buildings held for use in the production or supply of goods and services, or for administrative purposes, are stated in the Statement of Financial Position at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed every four years when the municipal valuation roll is updated.

Increases in the carrying amount arising on revaluation of land and buildings are credited to a Revaluation Reserve in the Statement of Changes in Net Assets. Decreases that offset previous increases of the same asset are charged against the Revaluation Reserve directly in the Statement of Changes in Net Assets; all other decreases are charged to the Statement of Financial Performance. Each year the difference between depreciation based on the revalued carrying amount of the asset is charged to the Statement of Financial Performance and depreciation based on the asset's original cost is transferred from the Revaluation Reserve to the Accumulated Surplus/ (Deficit).

Depreciation on revalued land and buildings is charged to the Statement of Financial Performance. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the Revaluation Reserve is transferred directly to the accumulated surplus / deficit.

Incomplete construction work is stated at historic cost. Depreciation only commences when the asset is commissioned into use. All other property, plant and equipment are stated at historical cost less depreciation and any accumulated impairment losses. Historical cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Municipality's accounting policy.

ACCOUNTING POLICY - 30 JUNE 2009

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits or service potential associated with the item will flow to the municipality and the cost of the item can be measured reliably. The carrying amount of a replaced part is derecognised. All other repairs and maintenance are charged to the Statement of Financial Performance during the financial period in which they are incurred.

Depreciation is charged so as to write off the cost or valuation of assets, other than land and buildings under construction over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis. The depreciation rates are based on the following estimated useful lives:

	Years		Years
Infrastructure		Other	
Roads and Paving	30	Buildings	30
Pedestrian Malls	30	Specialist vehicles	10
Electricity	20-30	Other vehicles	5
Water	15-20	Office equipment	3-7
Sewerage	15-20	Furniture and fittings	7-10
Housing	30	Watercraft	15
		Bins and containers	5
Community		Specialised plant and	
Improvements	30	Equipment	10-15
Recreational Facilities	20-30	Other plant and	
Security	5	Equipment	2-5
		Landfill sites	15

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised (net) in the Statement of Financial Performance. When revalued assets are sold, the amounts included in the Revaluation Reserve are transferred to the Accumulated Surplus/ (Deficit) directly in the Statement of Changes in Net Assets.

Heritage assets, which are defined as culturally significant resources are not depreciated as they are regarded as having an infinite life. Land is also not depreciated for the same reason.

The Municipality has elected to make use of the following transitional provision of Directive 4 relating to GRAP 17 on property, plant and equipment:

- + Application of the components approach in respect of infrastructure assets
- Review of useful life of item of PPE recognised in the annual financial statements.
- Review of the depreciation method applied to PPE recognised in the annual financial statements.

1.16. Investment Property

Investment property, which is property held to earn rentals and/or for capital appreciation, is measured initially at its cost. Subsequent to initial recognition investment properties are shown at fair value, based on periodic, but at least every three years, valuations by external independent valuers. Gains or losses arising from changes in the fair value of investment property are included in profit or loss for the period in which they arise.

The Municipality has elected to make use of the following transitional provision of Directive 4 relating to GRAP 16 on investment property:

- The entire standard to the extent that the property is accounted for in terms of GRAP 17.
- Disclosure of the fair value of investment property if the cost model is applied.

1.17. Intangible Assets

Intangible assets acquired separately are reported at cost less accumulated amortisation and accumulated impairment losses. Amortisation is charged on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

The Municipality has elected not to make use of the transitional provision of Directive 4 relating to GRAP 102 on intangible assets as the municipality is in full compliance with the requirements of this Standard.

1.18. Impairment of Tangible and Intangible Assets

At each Statement of Financial Position date the municipality reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the municipality estimates the recoverable amount of the cash-generating unit to which the asset belongs.

ACCOUNTING POLICY - 30 IUNE 2009

Assets that have an indefinite useful life, for example goodwill, are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Financial Performance, unless the asset is carried at a revalued amount, in which case the reversal of the impairment is treated as a Revaluation Reserve increase.

1.19. Inventories

Inventories consist of consumables and are stated at the lower of cost and net realizable value. Cost is determined using the first-in-first-out (FIFO) cost method. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

Unsold properties are valued at the lower of cost and net realisable value on a weighted average cost basis. Direct costs are accumulated for each separately identifiable development.

Redundant and slow-moving inventories are identified and written down from cost to net realisable value with regard to their estimated economic or realisable values. Consumables are written down with regard to their age, condition and utility.

The Municipality has elected to make use of the following transitional provision of Directive 4 relating to GRAP 12 on inventories:

The entire standard to the extent that it relates to water stock that was not purchased by the municipality.

1.20. Trade and other Receivables

Trade receivables are recognised initially at originating cost and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the Municipality will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 90 days overdue) are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the Statement of Financial Performance. When a trade receivable is uncollectible, it is written off in terms of the municipality's Credit Control and Debt Collection Policy. Subsequent recoveries of amounts previously written off are credited against to the Statement of Financial Performance.

1.21. Cash and Cash Equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts.

1.22. Revenue Recognition

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. Revenue from the sale of electricity and water prepaid meter cards are recognised at the point of sale.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly.

Service charges from sewerage and sanitation for residential and business properties are levied monthly based on a fixed tariff.

Interest and rentals are recognised on a time proportion basis.

Dividends are recognised on the date that the Municipality becomes entitled to receive the dividend.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant tariff. This includes the issuing of licences and permits.

Interest earned on investments is recognised in the Statement of Financial Performance on a time proportionate basis that takes into account the effective yield on the investment. Interest earned on the following investments is not recognised in the Statement of Financial Performance:

Interest earned on unutilised conditional grants is allocated directly to the unutilised conditional grant creditor, if the grant conditions indicate that interest is payable to the funder.

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

ACCOUNTING POLICY - 30 IUNE 2009

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Finance income from the sale of housing by way of instalment sales agreements or finance leases is recognised on a time proportion basis.

Revenue from public contributions is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment is brought into use. Where public contributions have been received but the municipality has not met the condition, a liability is recognised

1.22.1. Revenue from non-exchange transactions

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis.

Fines constitute both spot fines and summonses. Revenue from spot fines and summonses is recognised when payment is received.

Donations are recognised on a cash receipt basis or where the donation is in the form of property, plant and equipment, when such items of property, plant and equipment are brought into use.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment are brought into use.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

1.22.2. Conditional Grants and Receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the Municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.23. Related parties

Individuals as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Key management personnel is defined as the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

1.24. Unauthorised Expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.25. Irregular Expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.26. Fruitless and Wasteful Expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.27. Rounding

The amounts reflected in the financial statements of the Municipality are all in Rand, and all amounts are rounded off to the nearest Rand.

1.28. Other Exemptions Taken not Elsewhere Disclosed in This Policy

The Municipality has elected to make use of the following additional transitional provision of Directive 4:

Classification, measurement and disclosure of non-current assets held for sale.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2009

		2009	2 008
		R	R

The leased property, plant and equipment is secured as set out in Note 5.

14

The Municipality identified other properties, plant and equipment, with opening balances and adjustments during the year.

The Municipality has taken advantage of the transitional provisions set out in GAMAP 17. The Municipality is in the process of itemizing all infrastructure and community assets and will recalculate accumulated depreciation once this exercise has been completed by 30 June 2011. At present depreciation on these assets is calculated on an averaging basis whereby an average useful life has been estimated for each category of infrastructure and community assets, using global historical costs recorded in the accounting records.

Exemptions taken according to the exemptions gazetted in terms of Government Notice No. 30013 of 29 June 2007 and specifically paragraph 3(2) b of the notice.

- + Property, Plant and Equipment (GAMAP 17) Review of useful life of item of PPE recognised in the annual financial statements. [Paragraphs 59-61 and 77]
- Property, Plant and Equipment (GAMAP 17) Review of the depreciation method applied to PPE recognised in the annual financial statements. [Paragraphs 62 and 77]
- Property, Plant and Equipment (GAMAP 17) Impairment of non-cash generating assets. [Paragraphs 64-69 and 75(e)(v) (vi)]
- Property, Plant and Equipment (GAMAP 17) Impairment of cash generating assets. [Paragraphs 63 and 75(e)(v) (vi)]
- Impairments of Assets (AC 128) Entire Standard
- Intangible Assets (AC 129) The entire standards except for the recognition, measurement and disclosure of the computer software and website costs (AC 432) and all other costs were expensed.

Refer to Appendix B for more detail on property, plant and equipment, including those in the course of construction.

	Total debtors by customer classification	4 046 124	3 061 710	1 886 762

Concentrations of credit risk with respect to trade receivables are limited due to the municipality's large number of customers. The municipality's historical experience in collection of trade receivables falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the municipality's trade receivables.

Valuations on land and buildings are performed every four years. The last valuation came into effect on 1 July 2003. The basic rate was 1,67 c per Rand on land and buildings (2007 = 1,59c/R). There are 15 926 properties of which 13 430 are residential. Pensioners qualify for discounts of 20-40%

Rates are levied monthly and payable by the 7th of the following month. Interest is levied at the prime rate plus 1% on outstanding monthly instalments.

41 ACCOUNTING ESTIMATES AND JUDGEMENTS

Management discussed with the Audit Committee the development, selection and disclosure of the Municipality's critical accounting policies and estimates and the application of these policies and estimates.

41.1 KEY SOURCES OF ESTIMATION UNCERTAINTY

Impairment of trade and other receivables

The impairment of the municipality's trade and other receivables is based on incurred losses in accordance with the provisions of IAS 39. The historical loss experience of the municipality, based on observable data through the passage of time, is used to estimate the impairment of trade and other receivables. Any changes in the payment status of customers in a specific group or national or local economic conditions that correlate with defaults on the assets in the group will have an impact on the impairment of trade and other receivables.

Provisions

The provisions raised by the municipality are detailed in note 6. These provisions represent management's best estimate of the municipality's exposure. The probability that an outflow of economic resources will be required to settle the obligation must be assessed and a reliable estimate must be made of the amount of the obligation. Actual results may, however, differ from these estimates.

41.2 CRITICAL ACCOUNTING JUDGEMENTS IN APPLYING THE MUNICIPALITY'S ACCOUNTING POLICIES

Certain critical accounting judgements in applying the municipality's accounting policies are described below.

Revenue recognition

Accounting Policy clause 1.22 on Revenue from Exchange Transactions and Accounting Policy clause 1.22.1 on Revenue from Non-exchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality.

In making their judgement, the management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and, in particular, whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services is rendered, whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

Classification as investment property

The Municipality has reviewed its property portfolio and determined which items of land and buildings are held to earn rental revenue or for capital appreciation. Land and buildings fulfilling these requirements have been classified as investment property, whilst the remainder of the portfolio have either been classified as property, plant and equipment or inventory depending on management's intention in dealing with these properties.

Depreciation and the carrying value of items of property, plant and equipment

The estimation of the useful lives of assets is based on management's judgement. Any material adjustment to the estimated remaining useful lives of items of property, plant and equipment will have an impact on the carrying value of these items.

Determination of impairments of property, plant and equipment, and intangible assets

Management is required to make judgements concerning the cause, timing and amount of impairment. In the identification of impairment indicators, management considers the impact of changes in current competitive conditions, cost of capital, availability of funding, technological obsolescence, discontinuance of services and other circumstances that could indicate that an impairment exists. The municipality applies the impairment to its separate cash generating units. This requires management to make significant judgements and estimates concerning the existence of impairment indicators, separate cash generating units, remaining useful lives of assets, projected cash flows and net realisable values. Management's judgement is also required when assessing whether a previously recognised impairment loss should be reversed.

Determination of the recoverable amount of a cash-generating unit

Where impairment indicators exist, the determination of the recoverable amount of a cash generating unit requires management to make assumptions to determine the fair value less costs to sell. Key assumptions on which management has based its determination of fair values less costs to sell include projected revenues, earnings multiple, capital expenditure and market share. The judgements, assumptions and methodologies used can have a material impact on the fair value and ultimately the amount of the impairment.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 IUNE 2009

ACCOUNTING ESTIMATES AND JUDGEMENTS 41

Determination of the recoverable serviced amount of non-cash-generating assets

Where impairment indicators exist, the determination of the recoverable service amount of a non-cash generating asset requires management to make assumptions to determine the fair value less costs to sell and the value in use based on the depreciated replacement cost model. Key assumptions include the current replacement cost of non-cash generating assets and in certain instances an assumption about the commissioning date which determines the depreciated replacement cost of the non-cash generating asset.

Finance and operating leases

In determining lease classification the municipality evaluated whether leases are clearly operating leases or finance leases. Based on qualitative factors it is concluded whether leases are finance or operating leases.

Post-retirement medical benefits

The assumptions used to calculate the municipality's obligation with regards to post-retirement medical benefits, ex gratia pension payments and long service awards as more fully described in note XX. Any changes to these assumptions will have an impact on the liability at the reporting date and the related expenses to be recognised in the Statement of Financial Performance.

42	UTILISATION OF LONG-TERM LIABILITIES RECONCILIATION Long-term liabilities - Note 5 Used to finance property, plant and equipment – at cost Total	47 581 548 47 581 548 -	33 184 163 33 184 163
	Long-term liabilities have been utilized in accordance with the Municipal Finance Management Act.		
43	UNAUTHORISED, IRREGULAR, FRUITLESS AND WASTEFUL EXPENDITURE DISALLOWED There were no fruitless- or wasteful expenditure during the year.		
	"The financial statements for 2007 / 2008 were drawn up according to the GRAP standards but the budget were drawn up according to IMFO standrds. The depreciation of assets as applied according to GRAP standards resulted in the budget of certain functional areas being overspent by a total of R 4,748,062. The total operating expenditure for the 2007/2008 financial year of R197 857 276 is still below the total budget of R201 317 027 for the said period. The overspending on certain functional areas was approved by the Council on 26 November 2008.

46 RETIREMENT BENEFIT INFORMATION

Council employees contribute to the Cape Joint Municipal Pension Fund and SAMWU National Provident Fund which is defined contribution funds. Some employees contribute to the South African Local Authorities Pension Fund which is a defined benefit fund. The retirement benefit fund is subject to the Pension Fund Act, 1956, with pension being calculated on the pensionable remuneration paid. Current contributions by Council are charged against expenditure on the basis of current service costs. Full actuarial valuations are performed at least every five years. The last valuation was done on 31 March 2005.

The following table reflects information on the defined benefit retirement, pension and provident funds to which councillors and employees belong, and in respect of which there is not sufficient information available to make more detailed disclosures.

The relevant law requires every fund to do an actuarial valuation at least every three years.

	Last Actuarial Valuation	Total Assets R'000	Total Liabilities R'000	Contributing Members
Cape Joint Pension Fund	June 2008	3 677 016	3 677 016	3
South African Local Authorities Pension Fund	June 2006	5 022 610	5 022 610	44

Fair Value of Financial Instruments

The Fair Values of Financial Assets and Financial Liabilities are determined as follows:

- + the Fair Value of Financial Assets and Financial Liabilities with standard terms and conditions and traded on active liquid markets is determined with reference to quoted market prices;
- + the Fair Value of Other Financial Assets and Financial Liabilities (excluding Derivative Instruments) is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments;
- + the Fair Value of Derivative Instruments is calculated using quoted prices. Where such prices are not available, use is made of discounted cash flow analysis using the applicable yield curve for the duration of the instruments for non-optional derivatives, and option pricing models for optional
- · the Fair Value of Financial Guarantee Contracts is determined using option pricing models where the main assumptions are the probability of default by the specified counterparty extrapolated from market-based credit information and the amount of loss, given the default.

FINANCIAL INSTRUMENTS (continued) 47

47.2 Fair Value of Financial Instruments continued

Quoted Prices

Financial Assets in this category include Listed Redeemable Notes, Bills of Exchange and Debentures. Financial Liabilities include Bills of Exchange and Perpetual Notes.

In accordance with IAS 39.09 the Fair Values of Financial Assets and Financial Liabilities, together with the carrying amounts shown in the Statement of Financial Position, are as follows:

The management of the municipality is of the opinion that the carrying value of Financial Assets and Financial Liabilities recorded at amortised cost in the Annual Financial Statements approximate their fair values.

47.3 Capital Risk Management

The municipality manages its capital to ensure that the municipality will be able to continue as a going concern while delivering sustainable services to consumers through the optimisation of the debt and equity balance. The municipality's overall strategy remains unchanged from 2008.

The capital structure of the municipality consists of debt, which includes the Long-term Liabilities disclosed in Note 23, Bank, Cash and Cash Equivalents and Equity, comprising Funds, Reserves and Accumulated Surplus as disclosed in Notes 1 and 2 and the Statement of Changes in Net Assets.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2009

2009 2008 R R

47.3 Capital Risk Management continued

Gearing Ratio

The gearing ratio at the year-end was as follows:

 Debt
 47 581 548
 31 522 364

 Net Assets
 373 829 967
 358 045 649

 Debt to Net Assets ratio
 12,73%
 8,80%

Debt is defined as Long- and Short-term Liabilities, as detailed in Note 5.

Net Assets includes all Funds and Reserves of the municipality, disclosed as Net Assets in the Statement of Financial Performance.

47.4 Financial Risk Management Objectives

The municipality's Corporate Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the municipality through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, fair value interest rate risk and price risk), credit risk, liquidity risk and cash flow interest rate risk.

The municipality seeks to minimise the effects of these risks by using derivative financial instruments to hedge these risk exposures. The use of financial derivatives is governed by the municipality's policies approved by the Council, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and in the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continous basis. The municipality does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The Corporate Treasury function reports quarterly to the municipality's risk management committee, an independent body that monitors risks and policies implemented to mitigate risk exposures.

47.5 Significant Accounting Policies

Details of the significant Accounting Policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of Financial Asset, Financial Liability and Equity Instrument are disclosed in the Accounting Policies to the Annual Financial Statements.

47.6 Market Risk

The municipality's activities expose it primarily to the financial risks of changes in interest rates. Potential concentrations of credit risk and interest rate risk consists mainly of fixed deposit investments, long term debtors, consumer debtors, other debtors, short-term investment deposits and bank and cash belances.

There has been no change to the municipality's exposure to market risks or the manner in which it manages and measures the risk.

47.7 Interest Rate Risk Management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of fixed deposit investments, long-term debtors, consumer debtors, other debtors, short-term investment deposits and bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting transaction limits per finacial institution.

Consumer debtors comprise of a large number of ratepayers, dispersed across different industries and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Consumer debtors are presented net of an allowance account.

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges," "demand for payment," "restriction of services" and, as a last resort, "handed over for collection," whichever procedure is deemed most appropriate under the circumstances.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2009

47 FINANCIAL INSTRUMENTS (continued)

47.8 Effective Interest Rates and Repricing Analysis

In accordance with IAS 32.67(a) and (b) refer to Appendix A for the indication of the average effective interest rates of Interest-bearing Financial Liabilities at the reporting date and the periods in which they mature or, if earlier, reprice. The following indicates the income-earning Financial Assets:

30 June 2009 Description	Note ref in AFS	Average effective Interest Rate	Total R	6 Months or less R	6 - 12 Months R	1 - 2 Years R	2 - 5 More than Years 5 Years R

47.9 Other Price Risks

The municipality is exposed to equity price risks arising from equity investments. Equity investments are held for strategic rather than trading purposes. The municipality does not actively trade these investments.

47 FINANCIAL INSTRUMENTS (continued)

47.10 Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

All other financial liabilities are due and payable in less than 12 months.

FINANCIAL INSTRUMENTS (CONTINUED)

47.11 Credit Risk Management

Credit Risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality only transacts with entities that are rated the equivalent of investment grade and above. This information is supplied by independent rating agencies where available and, if not available, the municipality uses other publicly available financial information and its own trading records to rate its major customers. The municipality's exposure and the credit ratings of its counterparties are continously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

Potential concentrations of credit rate risk consist mainly of fixed deposit investments, long-term debtors, consumer debtors, other debtors, short-term investment deposits and bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting transaction/ exposure limits, which are included in the municipality's Invetsment Policy.

Trade receivables consist of a large number of customers, spread across diverse industries in the geographical area of the municipality. Ongoing credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, consumer deposits are adjusted.

Consumer debtors comprise of a large number of ratepayers, dispersed across different industries and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Consumer debtors are presented net of an allowance for impairment.

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy

Long-term Receivables and Other Debtors are collectively evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discount, where applicable.

The following table represents the municipality's maximum exposure to credit risk without taking account of the value of any collateral obtained:

	2009	2008
	R	R
The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:		
Fixed Deposit Investments	4 685	4 482
Long-term Receivables	17 645 873	12 758 836
Trade Receivables from Exchange transactions	21 008 136	22 439 453
Other Receivables from Non-Exchange transactions	6 873 612	5 596 438
Fixed Term Investment Deposits	92 146 276	51 082 923
Bank and Cash Balances	3 956 989	17 586 389
Maximum Credit and Interest Risk Exposure	141 635 569	109 468 521

EVENTS AFTER THE REPORTING DATE 48

During the period 11 to 13 November 2008 the Breede River Winelands Municipality experienced persistent rain.

The following estimated damage occurred:

Roads & Bridges	3 750 000
Storm water	5 000
Sewerage networks and treatment plants	480 000
Water networks and treatment plants	480 000
Environmental Services	605 200
Electricity	646 005
Libraries	2 000
Swimming Pools	43 000
Total Damage	6 011 205

49 CONTINGENT LIABILITY

None

50 RELATED PARTIES

Key Management and Councillors receive and pay for services on the same terms and conditions as other ratepayers / residents.

51 EXEMPTIONS TAKEN ACCORDING TO THE EXEMPTIONS GAZETTED IN TERMS OF GOVERNMENT NOTICE NO. 30013 OF 29 JUNE 2007 AND SPECIFICALLY PARAGRAPH 3(2)B OF THE NOTICE

- Financial Instruments: Recognition and Measurement (AC133) Initially measuring financial assets and liabilities at fair value. [SAICA Circular 09/06 paragraphs 43, AG 79, AG 64 and AG 65 of AC 133]
- Financial Instruments: Disclosure (AC144) Entire standard to be replaced by IAS 32 (AC 125) issued August 2006 and effective for financial statements covering periods beginning on or after 1 January 1998.
- + Segment Reporting (AC115) Entire Standard
- + Operating Segments (AC146) Entire Standard
- + Construction Contracts (AC109) Entire Standard
- + Business Combinations (AC140) Entire Standard
- Accounting for Government Grants and Disclosure of Government Assistance (AC134) Entire standard excluding paragraphs 24 and 26, replaced by paragraph 08 of GAMAP 12, paragraph 25 of GAMAP 17 and paragraphs 42 46 of GAMAP 9.

52 PROCESS TO COMPLY FULLY WITH THE IMPLEMENTATION OF GENERAL RECOGNISED ACCOUNTING PRACTICES (GRAP).

The municipality adopted a phased-in approach in order to comply fully with the implementation of GRAP. The municipality is classified by the National Treasury as a meduim capacity municipality and must comply with GRAP by 30 June 2010. The municipality, however, took advantage of transitional provisions and implement GRAP at an earlier date in order to ensure more reliant financial reporting. The implementation plan for full compliance with the requirements of GRAP is listed in Appendix "G".

53 DEVIATIONS IN TERMS OF PARAGRAPH 36 OF THE SUPPLY CHAIN MANAGEMENT REGULATIONS

In terms of paragraph 36 of the Supply Chain Management Regulations the Accounting Officer may –

- (a) Dispense with the official procurement processes established by this Policy and procure any required goods or services through any convenient process, which may include direct negotiations, but only
 - (i) In the event of an emergency, one written quotation is to be obtained;
 - (ii) If the required goods or services are available from a sole provider only, one written quotation is to be obtained. Documentary proof must be provided that the service provider is actually a sole provider;
 - (iii) In respect of repairs to motor vehicles, machinery and equipment that need to be stripped to quote, only one written quotation is to be obtained;
 - (iv) For the acquisition of special works of art or historical objects where specifications are difficult to compile; or
 - (v) Acquisition of animals for game reserves.
 - (vi) in any other exceptional case where it is impractical or impossible to follow the official procurement processes.
- (b) Ratify any minor breaches of the procurement processes by official or committee acting in terms of delegated powers or duties, which are purely of a technical nature.

The Accounting Officer must record the reasons for any deviations in terms of subparagraph (a) and (b) of this Policy and report them to the next meeting of the Council and include as a note to the annual financial statements.

The following number deviations were approved by the accounting officer:

	2009	
Emergency	219	
Sole provider	110	
Stripped to quote	138	
Acquisition of special works of art or historical objects		
Acquisition of animals for game reserves.		
Impractical or impossible	124	
Ratify any minor breaches		
Total Deviations	591	

Detailed lists of these deviations have been submitted to Council and is available at the municipal offices for inspection.

The supply chain unit was only established during the 2007/2008 and 2008/2009 financial years. A software program was also implemented for the administration and reporting of procedures. Statistics for the 2007/2008 financial year are unfortunately not available.
