LANGEBERG MUNICIPALITY

ELECTRICITY

*** Disclaimer:** NERSA must still approve the final tariffs for the 2024/25 financial year. It is unlikely that this approval will be granted before 31 May 2024. As such, Langeberg Municipality used the Eskom approved increase as a guide. Electricity tariffs are still subject to change until NERSA grants the final approval.

DOMESTIC CONSUMER TARIFFS

This tariff covers the supply of electricity for domestic use in private dwellings, flats and chalets with separate meters and includes churches, welfare buildings, hospitals, halls or similar premises with circuit breaker size or prepayment meter trip setting not in excess of 60Amp single phase or 80Amp three phase. Should Consumers require supplies in excess hereof, the Commercial Consumer or Bulk Supply tariff will be applicable.

LANGEBERG MUNICIPALITY

ELECTRICITY

INDUSTRIAL / BULK CONSUMER TARIFFS

The Bulk Supply tariff is for Consumers with a notified maximum demand of more than 100kVA or who require a supply greater than a 150Amp three phase circuit breaker size. The Notified Maximum Demand (NMD) is the maximum demand notified in writing by the Consumer and accepted by the Municipality. Should the NMD be exceeded in more than two months, the consumer's supply capacity and capital contribution must be reviewed.

AGRICULTURAL CONSUMER TARIFFS

This tariff covers the supply of electricity to farms for agricultural use from 11kV overhead lines through transformers with circuit breaker size not in excess of 60Amp single phase or 150Amp three phase (100kVA). Should Consumers have supplies in excess hereof, the Bulk Supply tariff will be applicable.

TIME-OF-USE

This tariff is based on the Eskom Local Authority "Megaflex" tariff (plus 10%), except that there is a single Basic Charge and Eskom's various kWh charges are included in one Energy Charge.

The Network Demand Charge is payable per month for the demand supplied (maximum demand reading) during peak and standard periods. No Network Demand Charge is payable during off-peak periods.

The Network Access Charge is payable per month based on the highest of either the notified maximum demand (min. 100kVA) or the highest maximum demand reading during the previous 12 months. The charge is applicable during all time periods.

The Reactive Energy Charge is applied to kVAh in excess of 30% (0.96 Power Factor) of kWh recorded during peak and standard periods. The excess reactive energy is determined per 30 minute integrating period and accumulated for the month and will only be applicable during high-demand season. The following conditions should be applicable to the TOU tariff: (i) Consumers with a minimum notified demand of 100kVA, and who are able to manage their energy consumption according to Eskom's specified time schedule, i.e. Peak, Standard and Off-Peak, for "Megaflex" tariff. (ii) Consumers must have the necessary electronic metering equipment installed and correctly programmed for this tariff at their cost. (iii) Where existing Consumers consider conversion to TOU, it will be the Consumers' responsibility to do a tariff study. (iv) At least 6 months TOU data (3 x high demand season and 3 x low demand season) must be available before the conversion can be implemented. (v) A change of tariff will apply for a minimum period of 12 months with three months mutual notice thereafter.

WHEELING

Wheeling between Generators within and outside of the Langeberg electricity networks to Langeberg consumers will be allowed on a pilot basis. This will only be done in line with the Langeberg Wheeling guideline and with approval by the Director Engineering Services and the CFO. The wheeling will be done to ensure revenue neutrality for the Langeberg Municipality. The consumers must be on one of the relevant Langeberg TOU tariffs and an additional basic charge will apply to the respective consumers. Generators within the Langeberg network will be charged at the standard TOU tariff in respect of their own consumption.

A use of system charge will be payable for consumers or off-takers or generators within the Langeberg Municipality network. The Implicit use of system charges (or wheeling credit method) is used by Langeberg. The wheeling energy credit is to the value of the wholesale electricity pricing structure (WEPS) less losses.

In cases of wheeling from a generator outside of the Langeberg network through Eskom, any additional charges relating to the wheeling will be charged to the off-taker.

Basic charge (additional to applicable tariff payable by the consumer – off-taker) per month NEW 2 926.00c

| Beneficiaries who did not sign purchase agreements and/or beneficiaries whose transfer fees are not paid. (A1891) PER MONTH | | | |
| DEFINITIONS | | | |
| AVAILABILITY FEES: The levying of and the liability for basic minimum fees in respect of immovable property, with or without improvements that is not connected to any municipal service network if such property can be readily connected. | | | |
| Availability charges are levied on premises which are not connected to Council's water, refuse, sewerage or electricity network, but which can reasonably be connected. | | | |
| Availability charges are not charged in the following circumstances: | | | |
| (a) Properties zoned for agricultural purposes, | | | |
| (b) Roads, play parks and parking areas belonging to house owners associations. | | | |
| (c) Properties which is land locked and cannot be developed. Should the property become accessible through registering of a servitude or pan handle entrance, | | | |
| will availability fees be charged. | | | |
