Load shedding checklist Prepare yourself by doing the following

Keep your **cell phone** fully **charged**

when the power is on.

If your cellphone battery is low, remember that you can use your car charger in your car or power packs.

Remember to **switch off your oven** if it was on when the power outage started.

Keep **frozen bottled water** in your freezer to help **keep food cold** during a power outage.

Access, security and safety

always remain a top priority - Know where the manual release lever of your electric garage door opener is located and how to operate it.

Invest in a small **LP gas lamp** for good quality lighting over a large area.

Keep boiled water in **thermos flasks** for hot drinks during a power outage.

Keep a battery-powered **torch** or **candles** in a place where it will be easy to find in the dark - make sure you have an extra set of fresh batteries.

Also keep a **key to your**

house with you if you regularly use the garage as the primary means of entering your home, in case the garage door will not open.

Prepare meals beforehand

in case of a power outage.

Invest in a small **LP gas heating ring** for essential cooking and to boil water for hot drinks - make sure you have an extra bottle of gas.

Keep a **small torch** on your bedside table at all times - make sure you have an extra set of fresh **batteries.**

Install **solar powered**

security and garden **lights.**

Make use of **surge protection:** Electric surges are one of the biggest causes of damage to equipment during a power outage.

Installing a surge protection device can help minimise damage.

Keep **refrigerator and freezer doors closed** at all times - a power outage of four hours should not cause food spoilage and a freezer should keep food frozen and safe for at least a day.

Most **medication** that needs **refrigeration**

can be kept in a closed fridge for several hours without spoiling - it is essential that you check with your doctor or pharmacist to be sure about your type of medication.

Never leave lit candles unattended and **keep out of reach of children.** Always extinguish candles before going to bed.

Back up your data:

Make it a priority to save your data offsite, in case of a hard drive crash or unforeseen electrical fault. Online "cloud-based" backups are very convenient and are mostly automated, which means that you have one less thing to worry about.

Everything you need to know about the wheelie bin system

The Langeberg Municipality first introduced the Wheelie Bin System in 2011, to reduce the carbon footprint in waste removal, by doing away with black bags.

This multi-year capital project is nearing completion, with towns such as Bonnievale, Robertson and Ashton having already received their bins. In the 2018-19 financial year, the municipality will purchase bins valued at R760 000 to be rolled out to the rest of the municipal area.

The bins are issued free of charge to all households within the municipal boundaries.

This is in line with the municipality's move towards an environmentally friendly and effective waste management system. The wheelie bins hold nearly three times as much refuse as normally used black bags.

Identifying your wheelie bin

Wheelie bins that are distributed with LM (Langeberg Municipality) are marked with the name of the town and the erf number of each property. The markings on the bin are to assist with identification.

Households can also mark their bins to make them identifiable, eg a sticker with the street name and house number.

Stolen wheelie bin

In the unfortunate event of a wheelie bin being damaged or stolen, it is replaceable at a cost of R520 per bin. We urge residents to keep their wheelie bins safe, and to report lost or stolen bins to the South African Police Service, and acquire a case number. After reporting your lost or stolen bin please contact the Department of Solid Waste.

What could happen if you use these wheelie bins for the wrong reasons?

The wheelie bin is only for household rubbish. Fines or written warnings can be issued if wheelie bins are being misused. Wheelie bins remain the property of the Langeberg Municipality and should not be taken with you, if you move from one house to another.

How to dispose of waste

Collection will be on a weekly basis, as per the waste removal schedule. On collection day place the bin on the pavement, with the clear bag (filled with recyclables) on top. Your bin should be on the pavement by no later than 08:00 on collection day. We will collect only the contents in the container. The lid must be closed. You should keep excess refuse until the following week and not place it beside the bin.

General Guidelines:

The wheelie bins hold nearly three times as much refuse as the black bags: wheelie bins can take up to 240 litres, compared to black bags' 85 litres.

- Place your sealed waste in the bin.
- Disinfect the bin regularly and store it in a cool place out of the sun.
- Do not place rubble, stones, rocks, sand, oil, metal (eg engine parts) or medical or hazardous waste and liquids into the bin. These items damage the working mechanisms of the refuse compactor unit.

- Do not put concrete, bricks, large stones or large pieces of metal in the bin.
- Do not put hot ashes or corrosive materials in the bin.

For more information regarding waste removal, please contact the Department of Solid Waste on 023 615 8000.

Entrepreneurship Day provides access to information

The Langeberg Municipality, in collaboration with the Small Enterprise Development Agency (Seda), recently hosted an Entrepreneurship Day at the Callie de Wet Community Hall in Robertson for potential entrepreneurs and business owners of the Langeberg area. It formed part of government's proactive strategy to support, develop and sustain South Africa's small, medium and micro-enterprise (SMME) sector.

One of the biggest challenges faced by entrepreneurs is to access information on the support, services and funding possibilities that are available

to them from different government agencies. Entrepreneurship Day not only aimed at improving this access, but also having the best possible SMME services and advice under the same roof.

About 120 entrepreneurs

attended and received information on how to start and run a business, register a business, form a cooperative and access funding.

Those attending also networked with stakeholders and other participants to forge possible business relations.

Entrepreneursdag verskaf toegang tot inligting

Die Langeberg-munisipaliteit in samewerking met die kleinondernemingsontwikkelingsagentskap (Seda), het onlangs 'n entrepreneursdag by die Callie de Wet-gemeenskapsaal in Robertson gehou vir entrepreneurs en sake-eienaars in die Langeberg-omgewing.

Dié dag was deel van die regering se proaktiewe strategie om die klein, medium- en mikro-ondernemings (SMME) te ondersteun, ontwikkel en

aan te moedig.

Een van die grootste uitdagings van entrepreneurs is om toegang te kry tot inligting wat hulle kan ondersteun, dienste wat hulle kan gebruik en finansiersingsmoontlikhede wat deur die verskillende regeringsagentskappe beskikbaar is. Dié entrepreneursdag is nie net gemik om die toegang tot inligting te verbeter nie, maar ook om die beste diens en raad aan

die SMME te gee – dit alles onder een dak.

Ongeveer 120 entrepreneurs het die dag bygewoon en inligting ontvang van hoe om jou eie sakeonderneming te begin, hoe om te registreer, hoe om 'n maatskappy te stig en hoe om toegang tot finansiering te kry. Die entrepreneurs het ook met verskeie aandeelhouers en ander entrepreneurs gesels en moontlike sakebelange is bespreek.
