CAPITAL PROJECTS UPDATE

UPGRADE WASTE WATER TREATMENT WORKS

- Project Status: Site establishment and the identification of services have taken place and minor excavations and construction related activities have commenced..
- Value of Project: R100 124 052.65 (Municipal Infrastructure Grant and own funding.)
- Location: Robertson Waste Water Treatment Works
- Commencement Date: 16 January 2023
- Estimated Completion Date: 20 October 2025

NEW MATERIAL RECOVERY FACILITY

- Project Status: Site establishment and the identification of services have taken place and minor excavations and construction related activities have commence.
- Value of project: R 19 022 223.06 (Municipal Infrastructure Grant and own funding)
- Location: Industrial Area, Ashton
- Commencement date: 16 January 2023
- Estimated completion date: 12 September 2023

PUMP STATION (3ML RESERVOIR, PIPELINE AND RELATED PIPEWORK

- Project Status: 88% complete with the top structure of the pump station building being finalised.
- Value of Project: R 24 300 999.60
- Location: Robertson
- Commencement Date: 25 March 2022
- Estimated Completion Date: 31 March 2023

NEW INFORMAL TRADING AREAS

- Project Status: 90% complete
- Value of Project: R2, 285 million (Montagu) & R793 000 (Bonnievale)
- Location: Mark Street, Montagu
- Commencement Date: 3 October 2022
- Estimated Completion Date: 28 February 2023

Load shedding checklist

PREPARE YOURSELF BY DOING THE FOLLOWING

Keep your **cell phone** fully **charged when the power is on**. If your cellphone battery is low, remember that you can use your car charger in your car.

Invest in a small **gas lamp** for good quality lighting over a large area.

Prepare meals beforehand in case of a power outage.

Install **solar powered** lights and / or ensure house / premises alarm batteries are working.

Load shedding may result in alarm systems not operating properly therefore **check with your insurer** if you are covered should you have a break in while the alarm is not powered.

Remember to **switch off your oven** if it was on when the power outage started.

Keep boiled water in **thermos flasks** for hot drinks during a power outage.

Invest in a small **gas cooker** for essential cooking and to boil water for hot drinks - make sure you have an extra bottle of gas.

Make use of **surge protection**: Electric surges are one of the biggest causes of damage to equipment during a power outage. **Installing a surge protection device** can help minimise damage. Have a surge protection device fitted to your electrical distribution board and switch off all devices when not in use - protects from surges, but also reduces energy use.

Keep **frozen bottled water** in your freezer to help **keep food cold** during a power outage.

Keep a battery- or solar-powered **torch or candles** in a place where it will be easy to find in the dark - make sure you have an extra set of fresh batteries.

Keep a **small torch** on your bedside table at all times - make sure you have an extra set of **fresh batteries**.

Keep **refrigerator and freezer doors closed** at all times - a power outage of four hours should not cause food spoilage and a freezer should keep food frozen and safe for at least a day.

Access, security and safety always remain a top priority - Know where the manual release lever of your electric garage door opener is located and how to operate it.

Also keep a **key to your house** with you in case your usual access to your house uses an electricity connection.

Most **medication** that needs **refrigeration** can be kept in a closed fridge for several hours without spoiling - it is essential that you check with your doctor or pharmacist to be sure about your type of medication.

Originally adapted from: Eskom Corporate Affairs, February 2015, For more info go to: www.eskom.co.za

Back up your data: Make it a priority to save your data offsite, in case of a hard drive crash or unforeseen electrical fault. Online "cloud-based" backups are very convenient and are mostly automated, which means that you have one less thing to worry about.

There has been a noticeable surge in the usage of online and remote services, from shopping on the web to doctor's consultations via the phone. The municipality encourages residents to make use of the following existing online and remote services to conduct municipal affairs.

PAY YOUR ACCOUNT

Your municipal account can be paid via online banking, by adding the municipality as a beneficiary or making a direct deposit at your nearest bank.

Once you have registered, another online alternative, EasyPay, can be used to pay your municipal account. Banking Details of Langeberg Municipality are as follow:

- Account name: Langeberg Municipality
- Bank: ABSA Branch: Montagu
- Account number: 105 000 000 8
- Branch code: 334 513
- Reference: Your municipal account number
- Swift code: ABSA ZA JJ

COFA APHA UFUNDE NGESIXHOSA

BUY ELECTRICITY

You can buy pre-paid electricity by making use of banking apps or online banking services, if the option is offered by their selected bank. Once registered, Pay Portal, PayCity and Prepaid24 are additional online platforms residents can use to purchase electricity.

ENQUIRIES AND COMPLAINTS

As part of Langeberg Municipality's aim to continuously strive towards service delivery excellence a 24/7 WhatsApp line was introduced in 2019 to make the reporting of resident's service delivery complaints more convenient.

The WhatsApp line serves as an addition to the existing methods of reporting, such as e-mail and telephone, and is in operation 24 hours a day, 7 days a week. Please make use of the following contact information to log your service delivery complaint:

- The WhatsApp number is 065 211 7822.
- 24/7 Call Centre number at 0860 88 1111,
- email: info@langeberg.gov.za

Enquiries that are not service related, and not urgent or an emergency can also be reported via Langeberg Municipality's social media accounts on Facebook, Twitter and Instagram.

STAY UP TO DATE WITH MUNICIPAL NEWS AND NOTIFICATIONS

Read the latest municipal news and updates wherever you are with a digital copy of the Langeberg Express.

You can find the latest, as well as older, issues on the municipal website www.langeberg.gov.za for you to read wherever you are.

Receive SMS notifications from Langeberg Municipality by simply registering on the database. In order to register please provide us with the following information:

- Name & Surname
- Cell Number
- Street Address
- Municipal Account Number
- Language Preference (Afrikaans or English)
- Ward Number

The above information can be sent on any the following platforms:

- Email: debiteure@langeberg.gov.za
- SMS & WhatsApp: 066 101 1632 or 066 163 9862
- Facebook, Twitter & Instagram: Langeberg Municipality
- Website: www.langeberg.gov.za
- Or simply complete the SMS database register forms at the reception offices of all 5 towns.

BE SAFE ONLINE

With the increase of online users also comes an increase of viruses and hackers trying to get hold of user's information. Langeberg Municipality encourage residents to ensure they remain safe and have adequate security software. Here are 5 tips from Google's Safety Centre to help you stay more secure online:

- **Create strong & unique passwords:** Creating a strong, unique password is one of the most critical steps that you can take to protect your online accounts. Do not use the same password to log into multiple accounts, social media profiles and retail websites.
- **Keep track of multiple passwords:** A password manager helps protect and keep track of the passwords that you use on sites and apps.
- **Defend against hackers with 2-Step Verification:** 2-Step Verification helps keep out anyone who shouldn't have access to your account by requiring you to use a secondary factor on top of your username and password to log in to your account.
- **Keep software up to date:** To protect yourself from security vulnerabilities, always use up-to-date software across your web browser, operating system, plug-ins and document editors.
- **Keep potentially harmful apps off your phone:** Always download your mobile apps from a source that you trust (such as your phone's native application store).
- **Use a screen lock:** When you are not using your computer, laptop, tablet or phone, lock your screen to keep others from getting in to your device.

JOIN OUR FIGHT AGAINST ILLEGAL DUMPING

KLIK HIER OM ARTIKEL IN AFRIKAANS TE LEES

Illegal dumping is escalating countrywide. Millions of rands are spent annually to clean up illegally dumped waste. Illegal dumping is becoming an increasingly tough challenge in the Langeberg municipal area too. It is an eyesore, creates a health risk and pushes up cleaning costs. Langeberg Municipality is doing its best to discourage illegal dumping, but now need our communities to join this fight too.

How does illegal dumping affect our communities?

- It compromises the overall cleanliness of areas.
- It creates health hazards.
- It creates perfect conditions for the outbreak of pests, bacteria, and rodents.
- It pollutes the environment and natural resources.
- It increases cleaning costs.

Why do people dump waste illegally?

- Excess waste generation.
- Bins are not put out in time on collection day, leaving too little bin space until the next collection date.
- Children are sent to dispose of waste in open spaces.
- Residents are unwilling to pay disposal costs at the waste facilities.
- Wheelie bins are emptied and used as transporting commodities.
- The construction industry does not comply with the conditions for building waste disposal.
- Informal traders, among others, do not adhere to the operating hours of waste facilities.

Where can additional waste be disposed of?

Private residents are entitled to dispose of one load of waste per month exceeding 1,000kg (1 ton) at our waste disposal facilities. Only waste from within the

Langeberg municipal boundaries is allowed. Residents must show their latest municipal account upon arrival.

What is Langeberg's current waste practices?

- Formal households, flats and businesses receive a weekly curb side refuse collection service.
- Waste is collected on specific days.
- Wheelie bins need to be placed on the kerbside by 8:00 on collection day.
- Homeowners and landlords are responsible for the waste of backyarders and tenants. Additional bins must be acquired to provide for the extra waste generated.
- Informal households receive a door-to-door black bag collection service. This practice forms part of the overall cleaning of informal and high-density areas.
- Find your waste removal schedule [here](#)

What can be done to stop the illegally dumping of waste?

- Cooperate and take collective responsibility to eradicate illegal dumping.
- Assist law enforcement by reporting illegal dumping.
- Encourage and promote responsible waste management practices – reduce, re-use and recycling.
- Educate and raise awareness.
- Fence off your property to prevent illegal dumping on your premises
- Make others aware of the importance of keeping our environment clean and litter free.

We need your help

Report illegal dumping to our 24/7 Call Centre

GUIDE TO BEING A GOOD NEIGHBOUR

We all want to live in a harmonious and safe community where everyone is respected and treated with kindness. Whether you're a homeowner, a tenant, or just someone passing through, there are simple ways to be a good neighbour and make a positive impact on the community. Here are some points to help you get started:

- **Get to know your neighbours:** Introduce yourself and say hello when you see them. If you have time, invite them over for coffee or a drink. Building relationships with your neighbours will make it easier to communicate and resolve any problems that may arise.
- **Be respectful of noise levels:** Whether you're playing music, having a party, or just talking loudly, always be mindful of the noise you're making. Be considerate of your neighbours and keep the noise levels down, especially during late hours.
- **Park in designated areas:** If you live in an apartment complex or a neighbourhood with limited parking, make sure you park in designated areas only. Avoid parking in front of driveways or in a way that blocks your neighbours from getting in and out of their homes.
- **Be a responsible pet owner:** If you have pets, make sure they're properly trained and well-behaved. Keep your pets on a leash and clean up after them. If your pets are prone to barking excessively, make sure to take steps to address the problem.
- **Be mindful of your waste disposal:** Properly dispose of any waste, such as recyclables, food scraps, and household hazardous waste. This helps keep your community clean and reduces the risk of attracting pests.
- **Respect privacy:** Always respect your neighbours' privacy by avoiding any actions that invade their personal space, such as peeking through windows or looking into their yards.
- **Offer help when needed:** If your neighbour needs help with something, such as carrying groceries or shoveling snow, offer to assist. Small acts of kindness can go a long way in building a strong and supportive community.
- **Report any suspicious activity:** If you see any suspicious activity in your community, such as a break-in or a fire, immediately report it to the authorities. Your actions could help keep your neighbours and community safe.

Being a good neighbour and resident is about showing kindness, respect, and consideration for others. By following these points, you can help create a harmonious and safe community for everyone to enjoy. So, let's all strive to be the best neighbours and residents we can be.

PROTECT YOUR CHILDREN, KEEP MEASLES IMMUNISATIONS UP TO DATE

The Western Cape Government: Health and Wellness is calling on all parents and caregivers to ensure children's vaccinations are up to date, so that they are protected against diseases, such as measles, which can cause serious harm. Right now, too many children are without protection against measles and other vaccine preventable diseases. As a result, the risk of large outbreaks has seriously increased.

[KLIK HIER OM ARTIKEL IN AFRIKAANS TE LEES](#)

In line with a nationwide effort to contain outbreaks of measles, as several other provinces already experienced, the Western Cape Department of Health is making additional booster doses available for every child under the age of 15, until 31 March 2023. These additional measles boosters will ensure healthy and thriving children.

SIGNS AND SYMPTOMS OF MEASLES

Measles is a highly contagious, serious disease caused by a virus in the paramyxovirus family. It is normally passed through direct contact and through the air. The virus infects the respiratory tract, then spreads throughout the body.

The measles virus also weakens the immune system and makes a child more vulnerable to other infectious diseases like pneumonia and diarrhoea. Signs and symptoms of the disease include:

- A high fever, which begins about 10 to 12 days after exposure to the virus and lasts 4 to 7 days.
- A runny nose, a cough, red and watery eyes, and small white spots inside the cheeks can develop in the initial stage.
- After several days, a rash erupts, usually on the face and upper neck. Over about 3 days, the rash spreads, eventually reaching the hands and feet. The rash lasts for 5 to 6 days, and then fades. On average, the rash occurs 14 days after exposure to the virus (within a range of 7 to 18 days).

HOW CAN CHILDREN STAY PROTECTED

In South Africa, children are given measles immunisation at 6 months and again at 12 months.

Even if immunised, your child can still get measles. However, he/she will be less exposed to the dangers thereof. If you have any questions about immunisations, or about your child's immunisation schedule, or how to catch up if your child's immunisation was neglected, talk to a health practitioner at your local clinic.

WHILE NO SPECIFIC ANTIVIRAL TREATMENT EXISTS FOR MEASLES VIRUS, VACCINATION REMAINS YOUR CHILD'S BEST DEFENCE.

MEASLES TREATMENT AND CARE

Severe complications from measles can be reduced with supportive care which ensures good nutrition, adequate fluid intake and treatment of dehydration.

A healthcare provider can prescribe antibiotics to treat eye and ear infections, and pneumonia.

Tips to care for a child who may have measles, at home:

1. Keep the child away from other people, until the rash is gone for four (4) days.
2. Keep the room where the child is resting, dark. Sunlight may harm the eyes.
3. Make sure the patient drink lots of clean water, or diluted juice. Cooled rooibos tea, mixed with a little bit of juice is also refreshing.
4. Ensure healthy eating.

WHO IS AT RISK?

- Unvaccinated, young children are at the highest risk of contracting measles and its complications, including death.
- Unvaccinated, pregnant women are also at risk.
- Any immune compromised person who has not been vaccinated, or who was vaccinated, but did not develop immunity, can be infected with the virus

Visit your nearest clinic in the Langeberg municipal area to get your child immunised.
(See the complete list of healthcare facilities in the Langeberg Municipal area on the next page)
