GET YOUR HOME READY FOR WINTER

Winter is just around the corner so make sure your home is prepped and as ready as your wardrobe will be for the chilly months ahead.

Autum is a really good time to start thinking about your home maintenance as well as getting it ready for the colder weather. Follow these useful tips to make sure your home is ready, inside and out, for the colder temperatures.

INSULATION IS KEY

One of the most basic, yet often forgotten, things to do when getting ready for winter is to check the windows and doors in your home for draughts. Make sure that every door and window are insulated and there are no air leaks, well ahead of winter. If need be, add thicker curtains to your windows to help keep out the chilly air.

CLEAN OUT THOSE GUTTERS

Make sure all your gutters are free of debris before winter sets in. Leaves and sticks can cause water to back up in your gutters and result in leaks and damage. This will be expensive to repair, particularly if water leaks

have occurred or the damage has extended to other parts of the roof.

DO NOT LITTER

Rubbish and litter blocks drains and sewers, worsening flooding in the rainy season. Instead of littering and illegal dumping, throw your trash in the bin or in plastic bags to put out when waste is collected.

INSPECT TREE BRANCHES

Scan your property for branches growing over the house, garage, driveway, or power lines. During a storm, those could come down and cause major damage. Branches rubbing together can also lead to breakage. If the tree belongs to the municipality, you can contact the Langeberg call centre to inspect.

PREPARE YOUR FIREPLACE

If you've got a fireplace, start gathering a few piles of wood. You can store the wood in your garage or outdoor storage cupboards, away from the elements. Also, make sure that your chimney is cleaned out. Once the chill hits, you should be fully stocked with wood and ready for warm, cosy nights by the fire.

COVER YOUR GEYSER

The water temperature of a geyser decreases by 1°C every hour. Therefore, energy is used up to preserve the warmth of the geyser. A geyser blanket prevents against the excess loss of heat. This enables the geyser to keep water hot for a longer period.

GET COSY

Adding rugs to your lounge and bedroom areas is not only comfortable underfoot but also creates warmth within rooms.

A winter throw or a warm blanket in the lounge can be particularly handy to huddle under, on frosty winter nights. Next, it's time to bring out the winter bedding and extra blankets for your bedrooms.

INSPECT AND SERVICE FIRE SAFETY SYSTEMS

Fire safety systems, including fire alarms and sprinkler systems, need to be inspected and serviced before the winter months. This includes checking for any damage, cleaning the systems, and ensuring they're in good working condition.

INSPECT THE ROOF

Your roof is another important part of your home, and you need to ensure that it's in good condition before the winter season. Inspect the roof for any leaks, loose or damaged shingles, and any other signs of wear and tear.

BRING YOUR PETS INDOORS

If you have pets, bring them indoors. If you cannot bring them inside, provide adequate shelter to keep them warm and make sure they have access to unfrozen water.

To avoid potential last-minute issues, it's always better to start preparing early. Following this pre-winter home checklist, you can ensure that your property is ready for the colder months ahead and looking great heading into Spring.

PROJECTS UPDATE

APRIL 2023

CONSTRUCTION OF NEW MATERIAL RECOVERY FACILITY

Project Status: Perimeter fencing completed, 55% installation of services completed, 60% of all bulk earthworks completed, Superstructure MRF 35% complete, 20% of the ablution facility complete.

Value: R19 022 223.06 (vat inclusive)

Location: Ashton

Commencement Date: 13 January 2023

Estimated Completion Date: 12 September 2023

UPGRADE WASTE WATER TREATMENT WORKS

Project Status: Construction has commenced on the following components and includes new inlet works which included grit removal, excavations completed for new reactor which will house mixers and aeration zone, excavations ongoing for new clarifier.

Value: R100 124 052.65 (vat inclusive)

Location: Robertson

Commencement Date: 18 January 2023

Estimated Completion Date: 20 October 2025

CONSTRUCTION REPAIRS TO HOFMEYER HALL

Project Status: Plastering and wall repairs 80%, Painting 30%, Carpentry 10%. Roof to be installed in May 2023.

Value: R 991 989.01 VAT incl.

Location: Montagu

Commencement Date: 02 March 2023

Estimated Completion Date: 05 December 2023

WILHELM THYS HALL FENCING

Project Status: Works at Wilhelm Thys Hall nearly complete

Hall Fencing Value: R 221 058.75 VAT incl.

Location: Wilhelm Thys Avenue, Montagu

Commencement Date: 14 March 2023

Estimated Completion Date: 26 May 2023

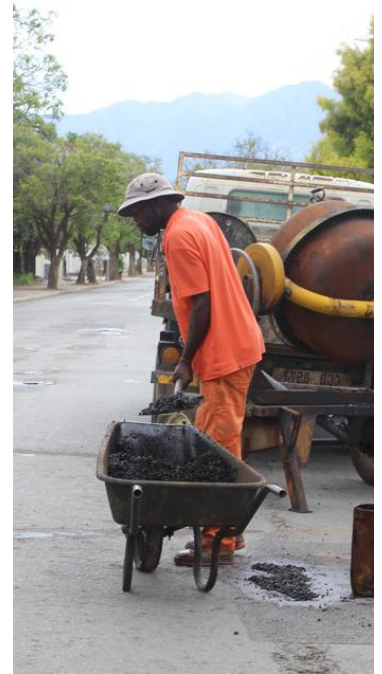

AVOID ELECTRICITY DISCONNECTIONS

Residents are urged to settle their service accounts to avoid disconnection of electricity supply and any additional costs, including reconnection fees.

A newly appointed service provider, Spectrum Utility Management (SUM), will be responsible for disconnecting electricity services to users who have not paid their bills in accordance with the Credit Control & Debt Collection Policy of the municipality.

[CLICK HERE TO READ MORE](#)

REPORT POTHOLES IN YOUR AREA

Potholes are fixed on a continuous basis in Robertson and throughout the municipal area. The municipality makes use of a pothole repair programme that maps out priority roads in all towns. Any new complaints received is also added to the programme for prompt resolution.

To address the current state of the roads, a tender has been advertised for the rehabilitation of roads in Robertson, Ashton, Bonnievale, and Montagu. It is estimated that the tender will be awarded to a service provider this month.

While it will not be possible to resurface all roads immediately, we are committed to continuously maintaining our roads and specifically addressing the issue of potholes.

Residents are urged to log complaints regarding potholes, uneven road surfaces, damaged pavements, and road signagewith our 24/7 call centre:

- Call: 0860 88 1111,
- WhatsApp: 065 211 7822,
- E-mail: info@langeberg.gov.za.

NUMBER OF POTHOLES REPAIRED IN 2023

TOWN	JANUARY	FEBRUARY	MARCH	APRIL
Ashton	85	1043	638	1923
Bonnievale	228	477	56	95
McGregor	20	46	87	34
Montagu	58	109	78	198
Robertson	955	590	2755	975

Why are we Loadshedding?

Loadshedding is done to protect the national electricity network by balancing supply and demand. If this is not done, the national grid will shut down entirely and the entire country will be blacked out for days to weeks.

What is loadshedding?

When there is **not enough supply capacity** to meet electricity demand it becomes **necessary to interrupt power supply at certain times, to certain areas.**

Loadshedding is only applied **when all contracted demand reduction has been exhausted.** By **rotating and shedding the load in a planned and controlled manner,** the system remains stable.

The **System Operator instructs stakeholders on the stage that is to be shed.** The duration of loadshedding will depend on the specific municipality, region or circumstances.

Causes of loadshedding

Coal supply/handling issues at power stations

Shortage/depletion of fuel at open-cycle gas turbine power stations

Failures of units at power stations

Demand prediction errors

Weather-related issues

Supply import issues

How does the Eskom System Operator respond?

Before loadshedding is applied, the following levers are exhausted:

- All generators are running at maximum available output
- Contracted demand reduction options are implemented with large customers

If all these options have been exhausted and demand still cannot be met, the System Operator will proceed with loadshedding.

THE IMPACT OF ESKOM LOADSHEDDING ON MUNICIPAL SERVICE DELIVERY

The implementation of loadshedding at higher stages impact the day-to-day operation of delivering quality services to our communities. Langeberg Municipality asks that the public please bear with us and assist us as far as possible. The following municipal services are affected:

CUSTOMER CARE CALL CENTRE

With loadshedding the landlines to the call centre are down. Send your requests via WhatsApp: 0652117822 or Call: 0610056381 or Email: complaints@langeberg.gov.za.

WATER DISTRIBUTION

Interrupted electricity supply strains the ability for water to be pumped to reservoirs. This can result in low to no water pressure.

WASTE WATER TREATMENT WORKS

Pump stations run on electricity. Interrupted electricity supply increase the risk of sewer spillage.

FURTHER ELECTRICITY DISRUPTIONS

When a stage of loadshedding ends other complications such as cable theft, damage or faults to electricity infrastructure or nuisance tripping could result in even further downtime.

MUNICIPAL & TRAFFIC OFFICES

During loadshedding the municipal offices can only offer limited administrative services. Traffic offices are also unable to conduct vehicle testing and administrative services. Please reschedule appointments.

WE NEED YOUR HELP

Please use water sparingly and switch off electrical appliances to avoid nuisance tripping. The Langeberg Municipality ask residents to be patient with these service delivery issues during loadshedding.

A NEW FIRE STATION FOR LANGEBERG

A brand-new fire station is currently under construction in Church Street, Robertson, right next to the Calle de Wet Sportsgrounds. Construction commenced on April 5, 2021, and has already made commendable progress. The development comes at a cost of R17 million, reflecting a significant investment in the safety and well-being of the local community.

The double-story fire station building will, upon completion, comprise of a reception lobby, administration offices, a board room, a lecture room, a gymnasium, sleeping quarters for 13 persons, a watch room, ablution facilities, kitchen facilities, and storage rooms. The garage will hold approximately six fire engines and a wash bay.

The construction of this new fire station is a significant step towards improving the emergency response capabilities of the firefighting team. With its strategic location and comprehensive facilities, the station will enable firefighters to respond swiftly and effectively to fire emergencies, minimising property damage and saving lives.

Residents of Langeberg can take comfort in the knowledge that this vital addition will serve as a shield, providing them with a heightened sense of safety and security.

Pictures in the article shows 3D renderings of what the new fire station will look like once completed.

HOW TO APPLY FOR EVENTS

All events in the Langeberg Municipal area has to go through an application and approval process to ensure the event is safe for the public and comply to the municipality's Events By-law. Event applications need to be submitted at least two month before the actual event date. The following steps will guide you through how the process works.

1

Contact us

Contact the municipality regarding a proposed event in the Langeberg Municipal area.

- **Call: 023 626 8276**
- **E-mail: awantza@langeberg.gov.za**

2

Determine if your event needs an application

After contacting the municipality, the matter is discussed to determine if the proposed activity is regarded as an event in terms of our Event By-law (**[Click here to read](#)**).

3

Apply for your event

If it determined that your event needs to follow the application process, an application form will be made available to complete. Once complete application, relevant document and proof of payment is received, and checked for completeness in terms of the Event Requirements document (**[Click here for the application form](#)**).

4

Evaluation of application

The complete application is sent to all Event Evaluation Team members to provide inputs. Clarity on comments / concerns are taken up with the event organizer. The comments are then included in a letter detailing the application outcome which is submitted to the Municipal Manager for review and signature.

5

Letter with application status

Once the Municipal Manager reviewed and signed the letter, it is forwarded to the applicant to inform them of the application outcome.

"Baking is my second love and despite the challenges, I believe in this bakery is destined for great things. If we take baby steps going forward, we will eventually reach our goals."

FOCUS ON SMME

BAKER'S LANE

In June 2015, Eunice Ncube took a bold step to pursue her passion and started Bakers Lane in Ashton. She had a vision to create a successful bakery and provide job opportunities for the community.

"Since the age of 18, I used to work predominantly in a well-known supermarket's bakery for nearly 23 years. I fell in love with baking. After discussions with my husband, we decided to start my business, and we started buying our own machinery gradually. After resigning, I was able to use my provident fund to start my business. I didn't want to work at the supermarket forever and dreamed of owning my own business", said Ncube.

Over the years, Ncube invested in her education and completed various business training courses with SEDA in collaboration with Langeberg Municipality. She knew that investing in herself would benefit her business in the long

run, and she was right. With the department's assistance, she was able to secure funding from the SEED Fund and qualify for IMEDP funding, which provided essential equipment for the bakery.

Despite the successes, Ncube faced significant setbacks. The COVID lockdown and the poor performance of the Langeberg factory forced her to downsize her staff and rely on her savings to keep the business afloat. However, she refused to let the challenges defeat her. She persisted and worked tirelessly to keep the business going.

"I feel like God sent me here to open this bakery. So even though there are dark times, I always believe there is light in the future. I'm a believer and have a very strong belief that great things are going to happen with the bakery".

In 2021, Ncube started afresh and picked up

where she left off. She remained determined and focused on achieving her goals. Today, Bakers Lane is thriving, providing job opportunities for six permanent employees and contributing to the community's economy.

When asked what she would recommend, Ncube said that people rarely walk out of the bakery without a cake slice, one of her best sellers. Their Melting Moments cookies are another popular product among customers.

Besides the baked goods, Ncube also sells take-aways daily and offers catering services; "we once catered for approximately 700 people", she stated.

Mrs. Ncube's story is a testament to the power of perseverance and resilience. She faced numerous challenges but never gave up on her vision. Her dedication to learning and improving herself and her business paid off, and she is now a successful business owner. Despite the challenges she faced along the way, she never lost sight of her goal.

INSTALLING ALTERNATIVE ENERGY SYSTEMS IN LANGEBERG

Langeberg Municipality supports the installation of private Alternative Energy equipment, particularly Rooftop Photovoltaic (PV) Systems.

WHAT IS A SOLAR PV SYSTEM?

Solar photovoltaic (PV) systems, or solar power systems, are renewable energy systems that convert sunlight into electricity. The electricity generated can be stored in batteries, used directly, or fed back into the electrical grid. Solar PV works well for a wide range of residential, industrial, commercial and agricultural applications; it is considered clean energy as no fossil fuel is required to generate the electricity.

Homes or businesses that have on site renewable energy generation, will benefit from lower electricity costs, and will contribute to a more secure and sustainable future.

WHAT IS ALTERNATIVE ENERGY EQUIPMENT?

Any device or equipment that are able to supply Electricity to an installation or part of an installation either when the Municipal supply is present or not.

This includes all types of Solar PV installations / back up standby generators and back up uninterruptable power systems (UPS) systems.

BEFORE APPROVING THE INSTALLATION AND PURCHASING OF A SYSTEM, THERE ARE KEY POINTS TO CONSIDER:

Before installing a PV system, it makes economic sense to become more electricity-efficient. By doing so, you will reduce the size and cost of the PV system you need. Consider installing an efficient water heater (solar water heater or heat pump), installing efficient lighting and switching to gas for cooking and heating.

Do not proceed with any alternative energy system installation until written authorisation has been granted by Langeberg Municipality following the relevant application. Follow these key points when considering the purchase and installation of an alternative energy - or back up system:

1. Obtain a structural assessment (PV system)
2. No need to submit building plans (PV system)
3. Make use of a reputable installer with references.
4. Determine the type of installation (Grid tied with feedback, grid tied with no feedback, hybrid, Off grid, UPS, Generator.)
5. Submit the application to the Municipality prior to purchase and installation.
6. Do not proceed with the purchase/installation before the installation is not provisionally approved by the Municipality.

CONNECTING ANY ALTERNATIVE ENERGY SYSTEM WITHOUT APPROVAL IS DANGEROUS AND ILLEGAL:

1. Illegally connected systems could compromise the safety of your family, municipal staff and the electricity grid.
2. Comply with Municipal and National legislation and regulations.
3. Households may be exposed to the risk of electrical fires and electric shock.
4. The safety and power quality of the electrical grid may be compromised by connections that use the wrong equipment or by adding unplanned generation capacity to a part of the network not designed to carry it.
5. The safety of electricity staff working on the reticulation network could be compromised by the electricity feeding into the grid from illegally connected alternative electrical equipment.
6. A fine and or disconnection of Electricity to the premises may be applied to illegally connected systems.

ALL NEW AND EXISTING ALTERNATIVE ENERGY SYSTEMS MUST BE APPROVED BY THE LANGEBERG MUNICIPALITY.

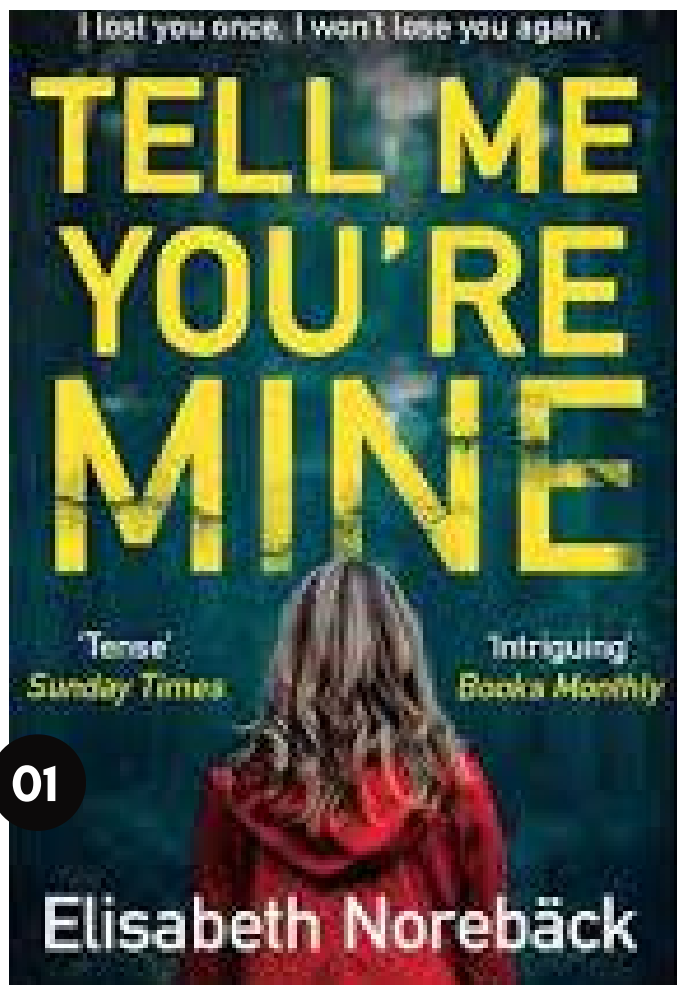

FOLLOW THE APPLICATION PROCESS TO SAFELY AND LEGALLY INSTALL AN ALTERNATIVE ENERGY GENERATION SYSTEM.

Tell Me You're Mine by Elisabeth Norebäck

More than twenty years ago, Stella Widstrand's baby vanished into thin air. Her body was never found, but the little girl was presumed dead. Not to Stella, though. She always thought that Alice was still alive. These days she's a successful therapist. And when a new patient walks into her office, Stella's life starts to fall apart.

In this riveting domestic suspense debut, a woman's life shatters when she meets a girl she believes is the daughter she lost years ago--and she finds that reclaiming the life she lost might cost her the life she has. Tell Me You're Mine is a story of guilt, grief, and the delicate balance between love and obsession.

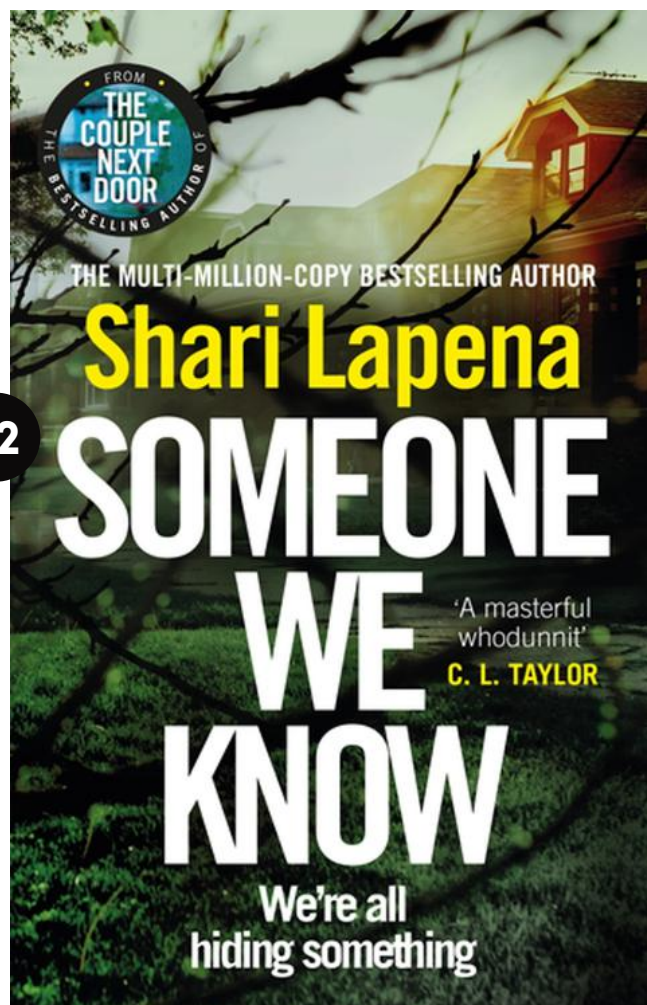

Where is the line between hope and madness?

Someone We Know by Shari Lapena

It can be hard keeping secrets in a tight-knit neighbourhood. In a tranquillity suburb of ordinary streets – one where everyone is polite and friendly – an anonymous note has been left at some of the houses.

"I'm sorry. My son has been getting into people's houses. He's broken into yours."

Who is this boy, and what might he have uncovered? As whispers start to circulate, suspicion mounts. And when a missing local woman is found murdered, the tension reaches breaking point. Who killed her? Who knows more than they're telling? And how far will all these very nice people go to protect their secrets?

MUNICIPAL NOTICES

CONCESSIONARY FUNDING FOR ENERGY SERVICES COMPANIES (ESCOs)

ENERGY SOLUTIONS FUNDING: Loadshedding has become a significant risk factor that threatens the survival of many SMEs. The IDC intends to reduce this impact, by providing concessionary funding to Energy Services Companies (ESCOs) to enable them to supply financed energy solutions to SMEs across all sectors of the economy.
