1. Objective

In developing and adopting this rates policy, the council has sought to give effect to the sentiments expressed in the preamble of the Property Rates Act, namely that:

- the Constitution enjoins local government to be developmental in nature, in addressing the service delivery priorities of our country and promoting the economic and financial viability of our municipalities.
- there is a need to provide local government with access to a sufficient and buoyant source of revenue necessary to fulfil its developmental responsibilities.
- revenues derived from property rates represent a critical source of income for municipalities to achieve their constitutional objectives, especially in areas neglected in the past because of racially discriminatory legislation and practices; and
- it is essential that municipalities exercise their power to impose rates within a statutory framework which enhances certainty, uniformity and simplicity across the nation, and which takes account of historical imbalances and the burden of rates on the poor.

Rateable property shall include any rights registered against such property except for a mortgage bond.

The council shall, in imposing the rate for each financial year, take proper cognisance of the aggregate burden of rates and services charges on representative property owners, in the various categories of property ownership, and to the extent to which this burden is or remains competitive with the comparable burden in other municipalities within the local economic region.

The council shall further, in imposing the rate for each financial year, strive to ensure that the aggregate budgeted revenues from property rates, less revenues forgone and less any contributions to the provision for bad debts, equal at least 25% of the municipality's aggregate budgeted net revenues for the financial year concerned. By doing so, the municipality will ensure that its revenue base and the collectability of its revenues remain sound.
